

ScreenTracker

graphical community health reports

Provide culturally appropriate graphical reports on illness prevalence
Provide health education and information
Monitor health in your community
Inform your community or region about health status

FEATURES

User friendly data entry screen

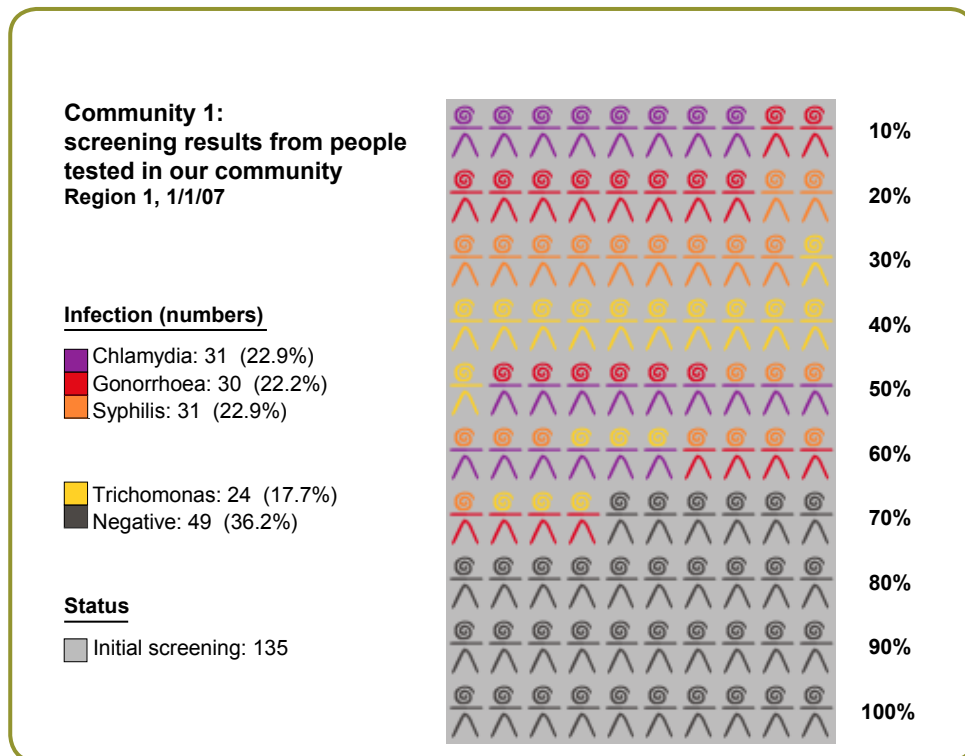

- View, print or email reports from the software
- Historical screening events maintained
- Colour coded numeric legend
- Percentages can be displayed if the population is over 300

CHALLENGE

How to present information about illness prevalence to communities and health organizations, Boards and staff in a culturally sensitive and appropriate way.

SUCCESS

ScreenTracker provides easy to follow, culturally sensitive and appropriate information about health screening events and levels of infection or illness within a community or region, for Indigenous communities.

OUTCOMES/BENEFITS

Provides graphical reports on:

- Initial Screening events
- Unscreened population potentially positive
- Clients treated
- Females, Males or people can be displayed
- Rescreening events

screen [skreen] - *noun*
to examine systematically for
disease or illness

tracker [traeke] - *noun*
to keep track of, that which can
follow tracks

“ScreenTracker has been an excellent tool for presenting health information to the Community in a format that is easy to understand and has good visual impact and it can easily be applied to other public health programs.”
Kirsty Smith, Tri-State Health Screening Project
